Ergo ALL • Ergo XLL

**5** models.  
Infinite  
possibilities.

A family of pallet and low lifter trucks for

# high demands on productivity

Manage your pallet loads with power and ease. All the way – from the shop floor to heavy-duty industrial environments – there's an Atlet truck designed for your needs. You'll easily create a truck fleet that will safeguard your operations. And featuring advanced technology and ergonomics, our family of pallet trucks and low lifters will get the job done in all conditions. What's more, smart modular design using fewer components maximises uptime and contributes to low life-cycle costs.

## The right truck for the job

There's a wide selection of Atlet pallet and low lifter trucks. For quick and safe internal transport and efficient handling on the loading bay. Or for smooth loading/unloading from floor level. For light or heavy loads, short or long distances. For walking, stand-on, stand-in or sit-on operations – there's an Atlet for any challenge.

## Max uptime is in the DNA

Sharing many components, all Atlet trucks are modular built on flexible technical platforms. This means fewer components are used which contributes to 98% uptime for your operations. And by only having to deal with a limited number of components, our mobile service engineers can complete over 95% of all repairs – on the first call.

## Friction Force technology for constant ground contact

Atlet's patented linkage design ensures that all the wheels – and in particular the drive wheel – always have ground contact. The truck carries the load safely, even on bumpy surfaces and ramps. And despite the narrow chassis, this design also makes the truck laterally firm and stable.

## Powerful AC motor

The energy efficient AC motor ensures that the truck responds to the slightest command from the operator, while regenerative braking saves energy and provides good stopping capability. This gives the operator total control of acceleration and braking, even on slopes.

## Offset tiller arm for safe operation

Equally suitable for right-handed and left-handed operators, Atlet's ergonomically designed tiller arm makes it possible for the operator to walk beside the truck. This gives full visibility over the fork and load, and it reduces the risk of foot injury. All controls are at the operator's fingertips.

## Onboard truck management

The control panel at the tiller arm clearly displays information on battery status, hour meter, date, clock and warning messages. The ATC truck computer has built-in service functions such as fault log, temperature logs, monitor functions, diagnosis, calibration and performance adjustment.

## Personal PIN code settings

The PIN code protected settings ensure that the operator has access to the right performance depending on driving skills, and they also prevent unauthorised use.

# Piccolo

## Ultra-compact for narrow spaces

Atlet Piccolo	PLL 145	PLL 180	PLL 200
Lifting capacity/class, kg	1450	1800	2000
Load centre, mm	600	600	600
Truck width, mm	660	660	660

### Ideal for confined areas

The narrow, nimble Piccolo has a strikingly tight turning circle and negotiates slopes and ramps with ease. This is the most compact pallet truck in the family and if there's room for a pallet, the Piccolo can easily reach it.

### Versatile efficiency

Nimble and versatile, the Piccolo is the perfect partner for a variety of materials handling jobs; onboard the delivery truck, on the loading bay, on the production floor or in narrow warehouses. This is also a tough piece of machinery for practically all conditions, from ambient temperature to chilly environments (with the option of cold store capacity down to  $-35^{\circ}\text{C}$ ).

### Fewer services for more uptime

The reliable Piccolo has long service intervals (500 hours) and is built to minimise servicing and maintenance requirements – all to keep life-cycle costs at a minimum and your uptime at a maximum.

### Convenient and safe operation

The high visibility provided by a low chassis and the asymmetrically positioned tiller arm allows the operator to control the truck efficiently and safely. The operator can walk either behind or beside the truck to fit into the smallest and tightest spaces.

# Duo

Flexible  
multitasking

Atlet Duo	PLE
Lifting capacity/forks class, kg	800
Lifting capacity/total class, kg	1800
Load centre, mm	600
Truck width, mm	660

## Two trucks in one

This compact pedestrian truck features dual functionality: a low lifter for heavy loads and an ergonomic lift function for picking. Perfect for shop floor restocking, order picking and short-distance internal transport, for example in smaller warehouses, supermarkets and production areas.

## Two pallets at a time

To ensure your operational efficiency, the Duo can even handle two pallets at a time – one on the forks and one on the straddles. This also contributes to a comfortable and ergonomic picking height and operation.

## Ergonomic tiller arm

The offset tiller arm with an integrated control panel adds to the operator's comfort and safety. Improved ergonomics and easy access to all data needed for operating the truck enhance both working conditions and productivity.

## Personal PIN code settings

The PIN code settings ensure that each operator has his/her own personal parameters logged in and that no unauthorised operator has access to the truck.

# Presto

Quick, strong  
and safe to drive

Atlet Presto	PLP 200	PLP 250
Lifting capacity/class, kg	2000	2500
Load centre, mm	600	600
Truck width, mm	770	770

## Steady at all speeds

Perfect for even the most intense loading/unloading and transport operations, this quick and powerful stand-on pallet truck, with protective foldable sidebars and a rigid platform, provides safety and top class stability even at high speeds.

## Low chassis for safety

The low chassis prevents foot injury and the compact design enables the truck to manoeuvre in tight spaces. The five-wheel design combined with Friction Force technology gives both high lateral stability and excellent traction. Servo steering further enhances comfort and comes as standard on the Presto 250.

## Smooth battery change

For efficient multi-shift operations, a quick battery changing system is available as the battery bed on rollers comes as standard.

## Robust truck in two sizes

The Presto features a heavy-duty chassis with integrated bumper and comes in two different sizes to suit your requirements for battery capacity

# Ergo ALL

Fast, compact  
and tough

## Stand-in versatility

This versatile heavy-duty stand-in transporter provides the operator with an ergonomic position with excellent all-round visibility – your perfect partner for long handling cycles and heavy goods flows. Compact design makes it ideal for confined spaces.

## Safety and ergonomics for productivity

The operator is fully enclosed in the truck for maximum safety. The operator's area is spacious with fully adjustable steering wheel height and right-hand armrest. Low instep and damped floor helps the operator to work efficiently for the whole shift.

Atlet Ergo	ALL
Lifting capacity/class, kg	2000
Load centre, mm	600
Truck width, mm	940

# Ergo XLL

Comfortable  
and speedy

## Sit-on comfort and efficiency

Designed for intensive heavy-duty operations, the Ergo XLL is a comfortable sit-on transport truck for all types of loads. Atlet's unique mini steering wheel with armrest reduces strain on the back, shoulders and neck. Fully adjustable armrest, seat and floor make it easy to find the perfect driving position.

## Optimised performance

Powered with a high performance AC drive motor, the high travel speed of the XLL – loaded or unloaded – ensures fast operation. The Atlet Stability Support System S3 ensures industry-leading safety performance by automatically controlling speed when manoeuvring.

Atlet Ergo	XLL
Lifting capacity/class, kg	2000
Load centre, mm	600
Truck width, mm	1010

## Get it right with Atlet Total.

Atlet Total means you have total control over your materials handling operations. All the way – from logistics planning and choosing the right trucks, to financing and services – you can increase warehouse efficiency and lower your total costs. Put Atlet Total to work, and focus on your core business.

### **LOGISTICS**

Analysis and planning of warehouse operations and truck fleet sizes.

### **TRUCKS**

A premium range of warehouse and counterbalance trucks – customised to your needs by Atlet.

### **RENTAL**

Flexible and tailor-made financing – short-term and long-term rental with uptime guarantee.

### **SERVICE**

Service agreements adapted to your operations save money and maximise uptime. With your dedicated Atlet mobile service engineer.

### **TRAINING**

Well-trained operators maximise efficiency and safety in your materials handling.

### **SAFETY**

Inspections, analysis and advice to ensure safe operation and lower costs.

### **OPERATION**

Analysis tools for daily monitoring of truck use, safety and environmental performance.
